

Dr. Li Hong Fen - International Center for Cancer Research

Dr. Li Hong Fen established International Chinese Medicine Research Center to UK for helping the cancer and asthma patients .She treats over 15,000 cancer patients at her well-known Research Center in Israel, China and London, 30% of whom come from all over the world. Dr. Li is a member of the European Association for Cancer Research & British Association for Cancer Research receives support from the Medical Center of Israel, China and UK, She is also a member of acupuncture society of UK .

Dr. Li Hong Fen M.D.

oncologist and lung specialist, and professor of traditional Chinese medicine in China and Israel.

Dr. Li, as she is known with unconcealed appreciation and affection by her many, many patients, including patients suffer from Breast cancer, ovarian cancer, brain tumor, lung cancer , prostate cancer, colon cancer, stomach cancer, pancreas cancer, lymphoma, Sarcoma, myeloma, leukemia, melanoma etc. She has been with us here in Israel for about 20 years and UK about 10 years . Dr. Li, who has headed significant studies with hopeful results, in the research and treatment of cancer and asthma in Beijing Xiyuan Hospital Of China Academy Of Chinese Medical Science (Nobel prize 2015) was invited to Israel for the purpose of studying cancer and asthma by the use of the ACNO and PCCJ herb medicine which have proved clearly efficient in the treatment of these diseases.

During her stay in Israel, Dr. Li initiated medical studies on cancer in the Immunology Department of Tel Aviv University, as well as on asthma in the Lung Department of the Sheba Hospital at Tel Hashomer, which published in NCRI cancer conference in the BT Convention center ,Liverpool UK 3-6 Novemver Abstract 2013 , B182 ,263 ; The Effect of a Chinese Herb Formula, Anti-Cancer Number One (ACNO), on NK Cell Activity and Tumor Metastasis in rats, International Immunopharmacology, 2001, 1: 1947-1956.

Another important project by Dr. Li is the establishment of the International Center for Chinese Medicine and Research, which quickly became a well-known medical center world-wide, attracting to it cancer and asthma sufferers from the ends of the earth, as well as many doctors from all over the world who are interested in research.

Dr. Li Hong Fen believes that it is not the cancer growth that kills you - but the weakening of the immune system. The use of the individually adapted herbal formulas is vital for the immune system during radiation and chemotherapy, because they provide significant protection for it, increase the production of cancer antigens and the number of red cells, and even dramatically reduce the serious side effects of treatments, such as: nausea, vomiting and destructive damage to the immune system.

Dr. Li emphasizes that the decision on the method of treatment is made only after receiving data from the tests and in accordance with the patient's condition. Some patients will recover only with the help of Chinese medicine, and for others Dr. Li will recommend a combination of conventional medicine and Chinese medicine. One of Dr. Li's patients says: "A few years ago, I contracted ovarian cancer. Conventional medicine presented a uniform, frightening front that was mostly irrelevant to the patient's simple basic needs.

"The meeting with Dr. Li changed my life and led amazingly to my recovery. Apart from her know-how and professionalism, Dr. Li also brings with her a huge soul. Her manner of speech and the confidence she inspires perform wonders. Her concern reaches the level of regulating the temperature of the air-conditioner in your room if she thinks that you are feeling cold. Dr. Li Hong Fen became my friend and an important part of my life."

G., a resident in a town in the north of the country, says: "The first time, liposarcoma was discovered in my groin, with nine metastases in Lungs

After chemotherapy my condition improved temporarily, but then the tumors reappeared in my lungs. While I was debating whether to forego additional chemotherapy, I met Dr. Li and began treatment with her. After a year , the growths disappeared altogether. At present I am continuing with preventive treatment, and have been clean for about 6 years."

S., from the center of Israel, says: "About a year ago I arrived at the clinic, a young woman suffering from breast cancer with metastasis in bone .

I was worried about the operation due to my young age, and I was seeking other methods of treatment. Dr. Li suggested that I begin therapy at her clinic, in combination with hormonal treatment . I did not undergo surgery and did as she said. The growth indeed disappeared. I have been clean for 1.5 year and my emotional state has improved immensely."

E., of Jerusalem, an orthodox mother of seven: "At age 8, one of my children (now 24) was diagnosed with brain tumor. The tumor was benign and was removed.

Two years later the growth reappeared and spread to the spine and was inoperable. For about one year the child underwent chemotherapy, which was ineffective. After I received a recommendation on Dr. Li, we began treatment with her, and within 6 months an improvement could be seen in the child's condition. 18 months later the tumor had almost totally disappeared. The doctors had no explanation for the dramatic improvement, but they said that in view of the encouraging results they recommend to continue with Dr. Li's treatment. 17 year past the boy became a quality student in University . When I am asked about her I say what all her patients say about her:

"Dr. Li Hong Fen is a modest angel in a white doctor's coat"!

THE DR. LI 'S HERBAL FORMULAS:

The herbal formula ACNO was developed by traditional Chinese medicine and has been in use for more than 30 years in China and for almost 20 years in Israel and world wide .

The accumulated experience in using the formula shows significant improvement in the function of the immune system, increase NK cells Activity and increased repression of cancer cells and prevention of their spread, as well as improvement in the function of liver and kidneys that are usually damaged during conventional treatment.

The herbal formula PCCJ is composed of an anti-asthmatic herbs and other medicinal herbs, and has proven its effectiveness in 90% of asthma cases.

The use of the formula reduces coughing and accumulation of sputum, and restores lung capacity to its normal condition.

The patients receive these formulas from the Chinese hospital in individually-adapted doses within three days after being ordered to special procedure via Prof. Yan xiao Ping and Dr. He Jian Hua , of the hospital of China Academy of Chinese Medical Science and China Resoures Sanjiu Medical Pharmaceutical Co,Ltd ,special produce single concentrated healthy Chinese herbal powder and granule in China, by means of Dr. Li Hong Bo - from her Research Center here in Israel and Director of Research Center of UK, Zhang BeiBei and Li Gang.

In recent years there has been a great opening to the Dragon medicine from the East, and the combination of conventional medicine and Chinese medicine is accelerating. Many patients with whom I spoke reported not only full or partial recovery and in amazing percentages, but also an improvement in their emotional condition and in the quality of their lives.
